Koppers Holdings Inc. Reports Fourth Quarter 2009 Results

Sales down 6% as CM&C business shows greater stability
Fourth quarter operating profit increases to \$10.0 million from \$0.6 million
Despite difficult economic environment company achieved operating profit of \$94
million and operating cash flow of \$112 million for year 2009

PITTSBURGH, February 17, 2010 - Koppers Holdings Inc. (NYSE: KOP) today announced results for its fiscal 2009 fourth quarter.

Consolidated sales for the fourth quarter of 2009 were 6% lower than sales in the prior year quarter. Sales for Carbon Materials and Chemicals (CM&C) increased by 1% or \$2.1 million over the prior year quarter, which was more than offset by lower sales in Railroad and Utility Products (R&UP), which decreased 18 percent, or \$20.7 million. The increase in sales in CM&C was due to an increase of \$12.6 million due to higher foreign translation rates, which offset lower volumes of carbon pitch. R&UP sales were lower due to lower volumes as strong buying patterns experienced earlier in 2009 moderated to normalized annual levels.

Net income attributable to Koppers for the quarter ended December 31, 2009, was a loss of \$13.4 million or \$0.66 per share as compared to income of \$75.0 million or \$3.66 per share in the fourth quarter of 2008, due primarily to refinancing charges for the fourth quarter of 2009 and a gain on the sale of Monessen in the fourth quarter of 2008. Adjusted net income and adjusted diluted earnings per share were \$4.7 million and \$0.23 per share for the three months ended December 31, 2009, compared to \$5.5 million and \$0.27 per share in the fourth quarter of 2008 after excluding after-tax charges of \$18.1 million for the fourth quarter of 2009 and \$16.9 million for the fourth quarter of 2008. The LIFO impact in the fourth quarter of 2009 amounted to \$5.6 million or \$0.17 per share and was primarily a result of higher quantities of coal tar inventory in North America as a result of increases in steel production coupled with an increase in the cost of petroleum-based products compared to the fourth quarter of 2008. Adjusted net income for the fourth quarter of 2008 also excludes income from discontinued operations of \$86.4 million primarily from the gain on sale of Monessen. A reconciliation of net income to adjusted net income is attached to this press release.

Page 2 - Koppers Reports Fourth Quarter 2009 Results

Adjusted EBITDA for the quarter ended December 31, 2009, was \$20.4 million compared to \$26.1 million in the fourth quarter of 2008, after excluding \$4.2 million of charges in the fourth quarter of 2009 for mechanical outages, plant closure costs and acquisition costs, and after excluding \$13.5 million of charges in the fourth quarter of 2008 for mechanical outages, inventory valuation costs and severance charges. Fourth quarter 2009 results were negatively impacted by lower carbon pitch volumes and lower volumes for untreated railroad crossties as a result of accelerated buying patterns for the Class I railroads in the first half of 2009. EBITDA for the fourth quarter of 2009 was negatively impacted by a \$5.6 million LIFO effect. A reconciliation of adjusted EBITDA to EBITDA and EBITDA to net income is attached to this press release.

Consolidated sales for the year ended December 31, 2009 were 18% lower than sales in the prior year. Sales for Carbon Materials and Chemicals (CM&C) decreased by 27% or \$237 million over the prior year, while sales for Railroad and Utility Products (R&UP) decreased 1%, or \$4 million. The decrease in sales in CM&C was due to lower volumes in all major product lines as a result of the global economic decline. R&UP sales were slightly lower than the prior year as significantly lower sales of treated crossties to commercial customers were largely offset by higher volumes of untreated ties, treated ties, and treating services for the Class I railroads.

Net income attributable to Koppers for the year ended December 31, 2009, was \$18.8 million or \$0.91 per share as compared to net income attributable to Koppers of \$138.0 million or \$6.65 per share in 2008, due primarily to the global recession and refinancing charges in 2009 and a gain on the sale of Monessen in 2008. Adjusted net income and adjusted diluted earnings per share were \$37.7 million and \$1.83 per share for the year ended December 31, 2009, compared to \$65.4 million and \$3.15 per share in 2008 after excluding after-tax charges of \$18.6 million for 2009 and \$17.7 million for 2008. Adjusted net income for 2008 also excludes income from discontinued operations of \$90.3 million primarily from the gain on sale of Monessen. A reconciliation of net income to adjusted net income is attached to this press release.

Adjusted EBITDA for the year ended December 31, 2009, was \$124.0 million compared to \$176.3 million in 2008, after excluding \$5.0 million of charges in 2009 and after excluding \$14.9 million of charges in 2008. Year 2009 results were negatively impacted by lower volumes for all major product lines for Carbon Materials and Chemicals, partially offset by higher profitability in Railroad and Utility Products due to an increase in volumes from the Class I railroads coupled with cost saving initiatives. A reconciliation of adjusted EBITDA to EBITDA and EBITDA to net income is attached to this press release.

Refinancing Activities

On September 15, 2009, the company called the remaining outstanding \$185.8 million face amount of the 9 7/8% Senior Secured Notes due 2013 (Senior Secured Notes) at 103.292%. The call was completed on October 15, 2009, and included a call premium of approximately \$6.1 million and the write-off of deferred financing charges of approximately \$3.1 million. The redemption of the Senior Secured Notes was financed by borrowing on the existing and previously undrawn \$300 million secured revolving credit facility which matures on October 31, 2012.

On November 12, 2009, the company announced a tender offer for all of its \$203 million 9 7/8% Senior Secured Notes at the call premium of 104.938% of principal value. The

Page 3 - Koppers Reports Fourth Quarter 2009 Results

tender offer was terminated on December 10, 2009, with 93.3% of the notes being tendered. The remaining outstanding notes were called on December 29, 2009. The aggregate tender and call premiums amounted to \$10.6 million and the write-off of deferred financing costs amounted to approximately \$2.6 million.

On December 1, 2009, the company completed the issuance of \$300 million of 7.875% Senior Notes due 2019 at an issue price equal to 98.311% of the principal amount of the notes.

Commenting on the quarter, President and CEO Walter W. Turner said, "Despite a difficult 2009, I am proud that our earnings proved resilient and we achieved the highest operating cash flow in the company's history. In addition, we refinanced our debt, saving \$10 million a year in interest expense while extending our maturities. We also took actions to increase our market shares for carbon pitch, crossties and new petroleum pitch products. When markets return to normal levels, we believe we will be in a strong position to capture additional volumes and improve profitability.

"In the Carbon Materials and Chemicals business, we continue to see increased stability in our aluminum end-market and also some signs of improvement with respect to demand for naphthalene and carbon black feedstock in Asian and Middle Eastern markets. Additionally, we have seen increases in global coke production and coal tar availability in 2010. Although we expect limited increases in aluminum production in 2010, we will focus on increasing market share in growth markets and consolidating in mature markets, which will ultimately benefit us as aluminum production returns to its stronger growth rates.

"We were also pleased that our Class I railroad end-market had a very strong year for maintenance despite depressed economic conditions, and we believe there is some upside potential in the commercial railroad markets in 2010 as the economy improves."

Koppers believes that adjusted net income and adjusted EBITDA provide information useful to investors in understanding the underlying operational performance of the company, its business and performance trends and facilitates comparisons between periods and with other corporations in similar industries. The exclusion of certain items permits evaluation and a comparison of results for ongoing business operations, and it is on this basis that Koppers management internally assesses the company's performance.

Although Koppers believes that these non-GAAP financial measures enhance investors' understanding of its business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP basis financial measures.
